Committing Task 4.

The screenshot displays a GitHub pull request interface. On the left, a commit history shows a commit by 'sharforazBjit' with a green checkmark. Below it, a comment box shows 'sharforazBjit' left a comment: 'Great! approved'. On the right, a sidebar shows the pull request details, including the branch 'Development', a notification to 'Unsubscribe', and a section for '3 participants' with three user avatars. At the bottom, a green banner indicates 'Changes approved' with '2 approving reviews by reviewers with write access' and '2 approvals'.

# Local Dining Guide
Web Based Dining Information Solution

Welcome to the Local Dining Guide project! This web-based software solution is designed to
provide users with comprehensive dining information, making it easy for them to explore
and discover local restaurants, cafes, and eateries. Whether you're a food enthusiast looking
for new culinary experiences or a traveller seeking the best dining spots in town, Local
Dining Guide has got you covered.

## Introduction
Local Dining Guide is a user-friendly platform that aims to connect users with local dining
options. It provides a rich and intuitive interface to search for restaurants, view their menus,
read reviews, and get directions. With a focus on enhancing the dining experience, this

## License
*This project is licensed under the [MIT License](https://www.bjitacademy.com/).*

## Development Technology

#### Front-End:
- HTML, CSS, JavaScript
- React (Front-end framework)
- Map integration libraries (e.g., Leaflet) for location-based features
- Responsive design for mobile and desktop devices

#### Back-End:
1. Node.js or Python (Server-side scripting)
2. Express.js (Web application frameworks)
3. MongoDB or PostgreSQL [(Database management)]
4. Geocoding APIs (for mapping and location data)

## Features

```

Conflict resolution

```
